Data Flow Diagram

Create a Data Flow Diagram (DFD) to show how weather data flows through the Rising Waters system between users, processes, and data stores to predict flood risk.

DFD Symbol Legend

Symbol	Name	Description
Oval / Rounded shape	External Entity	A person or organization outside the system that provides or receives data (e.g., Disaster Management Officer, Weather Department).
Rectangle with numbered header	Process	An activity that processes weather data and generates flood predictions (e.g., Data Validation, Flood Prediction, Result Generation).
Rectangle (solid fill, no number)	Data Store	A storage location that holds weather data and prediction records (e.g., Weather Database, Prediction Records).
Labeled arrow	Data Flow	Represents the movement of weather data and prediction results between external entities, processes, and data stores.

Example

The diagram below illustrates how the symbols above come together to form a complete data flow diagram.
